

## PlanetCCTV Software Version 4.0 Upgrade: Major New Features

- **Addition of MPEG4 compression** – effectively doubling record time (DivX)
- **Enterprise scale** - Up to 128 cameras – licenses now available for 4CH, 8CH, 16CH, 25CH, 32CH, 48CH, 64CH, 96CH and 128CH
- **Hybrid Class** - Mix IP Cameras and Analog Capture cards in same server
- **Up to 32 Cameras per Analog Server**
- **Synchronized Playback** - put up to 16 cameras into playback mode: User selectable number of cameras to be controlled simultaneously from the remote control.
- **Settable port addresses for firewall compatibility** – ability to set all TCP/UDP Port addresses on the General Window.
- **Allow ½X, 1X and 2X playback and fast forward speeds** - for both live and playback modes
- **View eight (8) servers simultaneously**
- **Sequential Output** - User programmable, analog output from capture to analog monitor. Set a time period to allow the analog single video out to scroll through the cameras
- **Flexible Resolution per camera**
- **Flexible video codec per camera – MJPEG or MPEG4**
- **Variable settings for MPEG4 Codec**
- **Administrative deletion of multiple alarm files**
- **Mapping** – map camera locations, floor by floor, location by location
- **Email notification of alarms**
- **3 Software Offerings: Analog Only, IP Network Only, or HYBRID – the mixing of analog and IP cameras**
- **Automatic Restart when recording interrupted**
